PROFESSIONAL SUMMARY

Java Developer with experience building and maintaining backend applications using Java and Spring Boot. Skilled in developing APIs, working with databases, and supporting deployment processes. Quick to learn, adaptable, and motivated to grow as part of a collaborative engineering team.

SKILLS

Backend: Core Java, Spring Boot, MySQL, PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ, Microservices.

Cloud & DevOps: AWS, Docker, Kubernetes, Git, GitHub Actions, GitLab CI.

Frontend (Supporting): HTML, Thymeleaf, CSS, Bootstrap.

Others: OOP, System Design, SOLID Principles, Design Patterns, Testing.

WORK HISTORY

JAVA ENGINEER (AI Systems) - Contractor | 05/2025 to 01/2026

Turing – Remote

- Developed, optimized, and maintained high-performance Java components for training and aligning large language models (LLMs).
- Built tools and workflows to support Reinforcement Learning with Human Feedback (RLHF), improving reward modeling pipelines.
- Led efforts on Supervised Fine-Tuning (SFT), collaborating with researchers to curate and structure high-quality task-specific datasets.
- Delivered insights and performance recommendations through peer reviews and evaluation reports.

JAVA BACKEND DEVELOPER | 06/2023 to 11/2025

Sysserve – Lagos, Nigeria

- Developed and maintained backend services with java and spring boot.
- Built and optimized REST APIs consumed by different applications.
- Gained experience with Docker, Kubernetes and AWS by containerizing applications and supporting deployments.
- Contributed to CI/CD pipelines using GitHub Actions and GitLab CI, improving code release processes.
- Worked with senior developers to refactor codes for better readability and maintainability.
- Collaborated with cross-functional teams to deliver features on time and support ongoing product improvements.

BACKEND DEVELOPER INTERN | 04/2021 to 04/2022

Awibi Medtech – Ilorin, Nigeria

- Assisted in developing secure REST APIs using Spring Boot for the Awibi Electronic Health Record system, improving how clinics manage patient data.
- Optimized database queries to ensure sensitive medical records could be retrieved quickly and securely.
- Wrote unit tests and fixed backend bugs to increase the stability and accuracy of the core healthcare platform.
- Collaborated with the engineering team to troubleshoot system issues, participate in code reviews, and manage version control using Git.

PROJECTS

Authguard (B2B Access Control Platform)

- Built a Spring Boot microservices backend with PostgreSQL, Redis, and RabbitMQ for multi-tenant RBAC.
- Implemented JWT token exchange and runtime permission checks so client apps enforce access rules without rebuilding auth in each service.
- Added scoped API keys, admin MFA, and an append-only audit log for API access and denied authorization events.
- Enforced subscription plan limits and Stripe/Paystack webhooks so tenant entitlements update automatically on upgrade or downgrade.

EvoCharge (EV Charging Intelligence Platform)

- Built a REST API with Spring Boot and Java 21 to combine charging station data from multiple operators into one backend.
- Developed an EvoScore ranking service using distance, availability, wait time, and connector matching to recommend the best stations.
- Implemented live station updates with Server-Sent Events and Spring scheduled tasks for real-time network status.
- Integrated Amazon Bedrock and DynamoDB to power a natural-language charging advisor with persistent station data storage.

EDUCATION

Bachelor of Science | University of Ilorin, Nigeria | Expected 10/2026

Relevant Coursework: Data Structures, Algorithms, Database Systems.

ACCOMPLISHMENTS

- **AAF Scholarship Beneficiary** - Awarded for Academic Excellence and Leadership Potential.
- **Organizing Member, Google Students Developers Club** - Contributed to planning, coordinating, and executing impactful tech events and initiatives for the student developer community.
- **NSBS Students' Representative Council Leadership Award** - Honored for student leadership roles and initiatives impacting 800+ students.
